(P) Feet	(G) Feet	

See Tab 100-24 or 100-25 for pavement quantities.
See Tab 112-9 for shoulder quantities.

ROADWAY IDENTIFICATION

PLAN VIEW

9" HMA Paved Shoulder at guardrail. 8" PCC may be substituted with the following jointing layout:

Match mainline pavement joint spacing. When mainline pavement is 8" or greater in thickness, place additional transverse 'C' joints in shoulder at mid-panel of the mainline pavement. Place longitudinal 'C' joint at P/2 from edge of mainline pavement when P is greater than 10' wide. Terminate longitudinal joint at transverse joint less than 10' in length.

Compaction of HMA is required to face of guardrail post. Hand compaction will be allowed under guardrail. Removal and reinstallation of guardrail will be allowed with no additional payment.

Refer to Tabulation 112-9 for shoulder quantities.

NEW CONSTRUCTION

EXISTING SHOULDER

PAVED SHOULDER AT GUARDRAIL

- ① For subgrade treatment, refer to other details in the plan.
- ② PCC option only: When guardrail posts are installed prior to construction of PCC paved shoulder, fasten form board to the face of guardrail posts for the length shown. Refer to note 4 for final 2 posts.
- ③ Continue paved shoulder to existing paved shoulder or 20 feet beyond the center of the first post.
- ④ Shoulder may be notched for final 2 posts or post sleeves may be installed through pavement. Do not drive posts through pavement.
- ⑤ 'KT-1 joint for PCC shoulder.
'B' joint for HMA shoulder.

- ① Typical section shown may be modified appropriately in areas of super elevated curves or other locations specifically designated by the engineer. At existing super elevated areas match existing cross slopes and transition rates.
- ② Class 13 quantities include trench width (BW) plus 1' x both Lt. & Rt. sides.
- ③ Provide a vertical clean edge similar to milling machine results. Incidental to Class 13 Excavation.
- ④ Shoulder material as specified elsewhere in these plans; refer to Typical 7135 on sheet B.8 for Type 'B' shoulder adjacent to PCC overlay.
- ⑤ Refer to Typical ML-JNT1 on sheets B.9 - B.12.
- ⑥ Refer to Typical MILL-2 on sheet B.2.

*** The contractor shall pave proposed shoulders thru all unpaved side road, paved side roads, and entrance intersections. At the existing paved intersections, the existing pavement will be removed.

End Date 03/04/2020

General Information

Measurement units for this survey are US survey feet. This survey is for unspecified bridge work, @ Four Mile Creek 0.3 mi north of Co Rd F22. Project datum and control information is provided by Design Survey Office. This project is a partial field survey, supplemented with photo control.

Vertical Control

Vertical Control was established on this project by 6 hour GPS static sessions. Vertical datum for this survey is relative to NAVD88. Geoid 12 B was used in processing. GRS80 Ellipsoidal Height was computed at project Pts. Vertical control was checked with IARTN checks.

This survey observed AB Plan bridge cap to compare to local ground control:

South bridge cap AB Plans Project # FN-69-4 (54)--21-77 Elevation 948.95
= South bridge cap Survey Elev. = 948.50

Horizontal Control

The project coordinate system for this survey is Iowa RCS Zone 8 (U.S. Survey Feet). This survey control is relative to IARTN reference stations. IARTN Reference Station coordinates are relative to the National Reference Station network datum: NAD83 (2011). Coordinates were determined by conducting six hour static observations. control was checked with IARTN checks.

Point Name	Northing	Easting	Elevation	Description

CP 5	7566498.859	18531693.108	979.906	Feno Monument

Alignment Information

US Hwy 69

The alignment for this survey is a retrace of As-built Plans Project # 187 (3). Survey stationing was equated to the plan at PI Sta. 189+98.0, and was run back and ahead with no equation throughout the survey.

Survey stationing relates to as built plan stationing as follows:

PI Sta. 163+60.20 This Survey
= PI Sta. 163+58.5 As-built Plans Project # 187 (3)
= PI Sta. 163+56.41 As-built Plans Project # STP-69-4(87)--2C-77

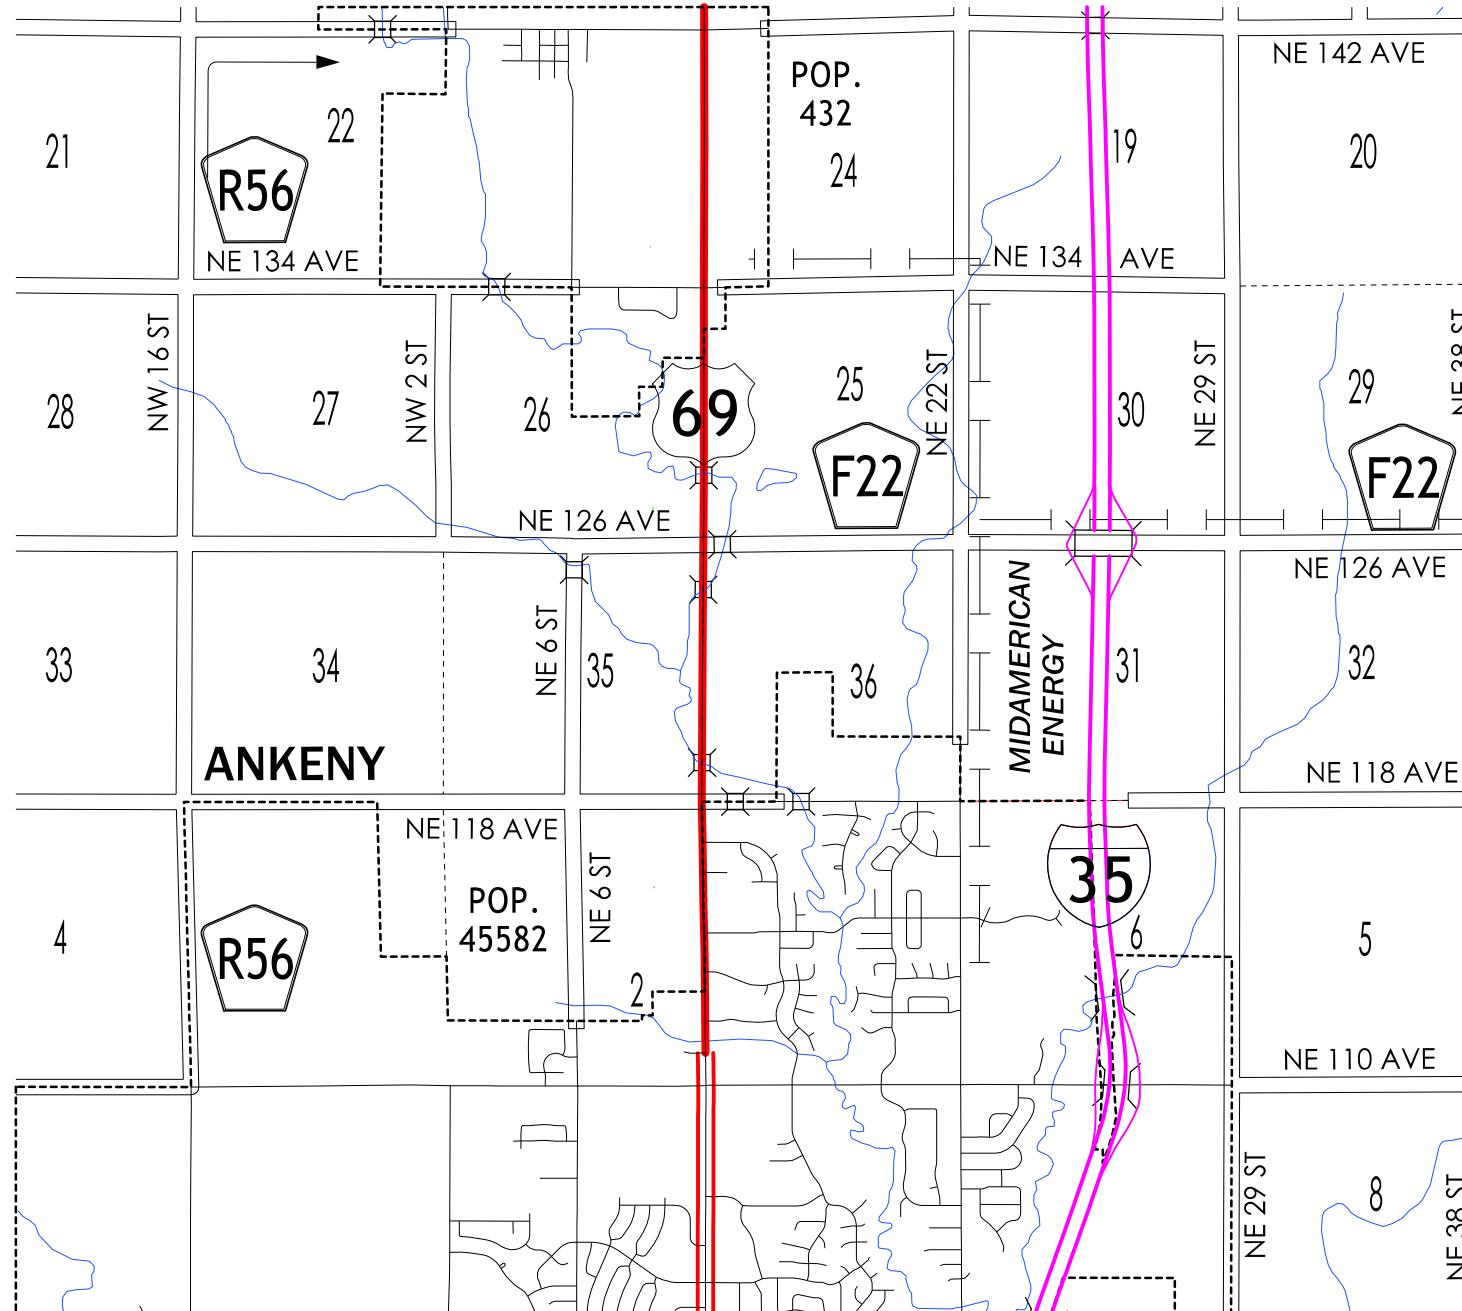

PI Sta. 189+98.0 This Survey
= PI Sta. 189+98.0 As-built Plans Project # 187 (3)

PI Sta. 216+32.38 This Survey
= PI Sta. 216+32.1 As-built Plans Project # 187 (3)

PI Sta. 242+72.91 This Survey
= PI Sta. 242+73.1 As-built Plans Project # 187 (3)

CONTROL POINT VICINITY MAP

This map is a guide to the vicinity of the primary project control points
Primary control is for use with RTK base stations and for RTN validation.
Future surveys will use primary project control to establish temporary control as needed for construction or other surveying applications.
