FINAL PROJECT CONCEPT STATEMENT

Linn St and SE Marshall St Intersections in Boone Tama County

HSIPX-030-4(113)--3L-08
PIN: 24-08-030-020

Donna Matulac, PE
District 1 Office
December 13, 2023

I. STUDY AREA

A. Project Description

US 30 is a 4-lane roadway with a 45 mph speed limit. There is an existing at-grade intersection at both Linn Street and Marshall Street with only stop control on the side roads.

B. Need for Project

This project was identified through the US 30 Corridor Plan which looked at all intersections on US 30 in Boone County between R18/L Ave west of the Des Moines River to Lincoln Way / X Ave interchange on the east limit of the County. This was identified as a safety project consisting of closing the full access at Linn Street, converting this intersection to a right-in/right-out, and constructing a roundabout at the Marshall Street intersection.

Figure 1: *Project Location*

C. Traffic Estimates

2019 ADT was 12,066 vpd with 8% trucks. The 2047 ADT is projected to be 14,325 ADT with 8% trucks.

D. Access Control

Access rights will not be acquired for this project.

E. Crash History

During the five-year study period from January 1, 2018, through December 31, 2022, there were 30 crashes within the project area including 1 fatality. In 2023 there was an additional fatality in the corridor. 19 of the 30 crashes were related to failing to yield the right of way either from a stop or yield condition.

II. PROJECT CONCEPT

A. Feasible Alternatives – See attached exhibit

1. It is proposed to close the full at-grade access intersection at Linn Street and create a right-in/right-out access only. It is also proposed to construct a new roundabout at the Marshall Street intersection. Proposed work does not include the local roadway connections on the north side of US 30 other than what is needed to tie into Marshall Street. Traffic would be maintained during construction.

Estimated Project Cost

PCC Pavement – (11,000 SY @ $75/SY)	$ 825,000
Granular Subbase – (12,000 SY @ $10/SY)	$ 120,000
Paved Shoulder, HMA, 8” – (5,000 SY @ $60/SY)	$ 300,000
Special Backfill – (1,500 CY @ $35/CY)	$ 52,500
Earth Shoulder Construction – (75 STA @ $280/STA)	$ 21,000
Excavation, Class 10, Roadway and Borrow – (11,500 CY @ $10/CY)	$115,000
Subdrain, longitudinal – (6,000 LF @ $10/LF)	$ 60,000
Aprons, Concrete 24” – (8 each @ $2,500/each)	$ 20,000
Culvert, Concrete Roadway Pipe, 24" – (600 LF @ $150/LF)	$ 90,000
Topsoil, Strip Salvage and Spread – (6,000 CY @ $12/CY)	$ 72,000
Signing and Markers	$ 10,000
Traffic Control – 10%	$169,000
Mobilization – 10%	$169,000
Contingency – 30%	$610,000
Right-of-Way	$200,000
Total Estimated Project Costs	**$2,833,500**

B. Detour Analysis

US 30 will remain open to traffic with lane closures as needed.

C. Construction Sequence

It is anticipated that all work on this project will be awarded to one prime contractor. The Design Bureau will design the roundabout and all associated roadway items and the Bridges and Structures Bureau will design any needed drainage structures.

D. ADA Accommodations

There are no ADA facilities within the limits of this projects, and no new facilities will be added with this project.

E. Special Considerations

This will be a traffic critical project.

No railroads exist within the limits of this project.

Right of Way will be required for this project.

F. Program Status

This project will be listed, using SR funds, in the 2025-2029 Iowa Transportation Improvement Program, with $3,000,000 programmed in FY 2026.

Roundabout Design Criteria Documentation

Max Entering Design Speed	30 mph
Inscribed Circle Diameter (ICD)	200'
Circulatory Lane Widths	14' inside, 16' outside
Crown Location	Truck apron drains to the central island curb and gutter. Crown at 12' from inside lane of Roundabout
Entry Lane Width	US 30 - 12'-15' , Side Road - 14'-18'
Entry Radius	60' to 120'
Exit Lane Width	US 30 - 12'-15' , Side Road - 14'-18'
Exit Radius	>200'
Min. Central Island Diamater	75'
Apron Curb	4" Sloped
Outside Curb	6" Sloped***
Island Curb	6" Sloped
Jointing Approach	Isolated

QUESTIONS:

Road update regarding roundabout expert review from MSA.

District update on Daisy facility.

Does District want any of the removed pavement?

Existing shoulders are combination shoulders - 4-foot paved, 6-foot rock along the outside and 4-foot paved, 2-foot rock in the median. Does District want to match the existing shoulder type and width with this project?

Will District coordinate the TCP checklist for this project?

Since this project will use safety funds, does FHWA need to be included on all letter distributions (e.g. the D2 letter)?

Notes:
Quantities have been determined on the basis of a design weight of 140 lbs. per cubic foot.

① Place and compact material to the dashed lines; then blade and shape to foreslope that portion above the solid line in the outer 2' and roll with loaded truck tire.
② Existing shoulder surface to be shaped to a uniform cross slope prior to placing granular shoulder material. Shape to ensure the thickness of the granular shoulder material is not less than the thickness of the resurfacing. Shaping shall be paid for in accordance with Section 2121 of the Standard Specifications.
③ Tons per side per station.

SURVEY INDEX

County: Boone
PIN: 21-51-034-010
Project Number: NHSN-030-4(116)--2R-08
Location: US 30 from 0.2 miles E. of S. Story St. to Quill Ave.
Type of Work: Partial DTM Survey
Project Directory: 0803002024

Survey Personnel

Tom Hoyle – Lead Survey Technician
Brad Duffy – Survey Technician
Max Phillips - Survey Technician
Dave Ciskowski – Survey Technician

Date(s) of Survey

Begin Date	03/28/2024
End Date	05/23/2024

General Information

This survey is for US Hwy 30 from 0.2 mi E of South Story St. to Quill Ave. This survey includes portions of SE Marshall St. and Crown Flair Drive. This project is a Partial Field DTM, Project Control, Post Flight Photo control and SUE QLD.

Utility Information

For logging data and other utility details see Utility Survey and Ownership Report in the Utility folder of the PrelimSurvey project directory.

Project Control

Nearby Iowa Real Time Network reference stations were utilized to obtain horizontal and vertical control on primary project control points. Between three and five (300 epoch) five-minute observations were taken with a minimum two-hour time span between and used in a weighted average to obtain final coordinate values.

A double run level loop was run through control points 1-4. The RTN derived elevations of control points 1 - 4 were held fixed. The estimated standard error of the observed height differences from the network adjustment was 0.0157 ft/mile.

NGS mark GSVS 080 (DP4534), CP4 was tied it's record orthometric height of 1109.56 is 0.034' lower than the elevation derived by this survey of 1109.594. NGS mark GSVS 081 (DP4535) was leveled through its record orthometric height of 1113.48 is 0.011' lower than the elevation derived by this survey of 1113.491. NGS mark GSVS 082 (DP4536), CP1 was tied it's record orthometric height of 1139.78 is 0.028' lower than the elevation derived by this survey of 1139.808. Due to the proximity of NGS mark GSVS 081 (DP4535) to a tree it was not used as a primary control point on this project.

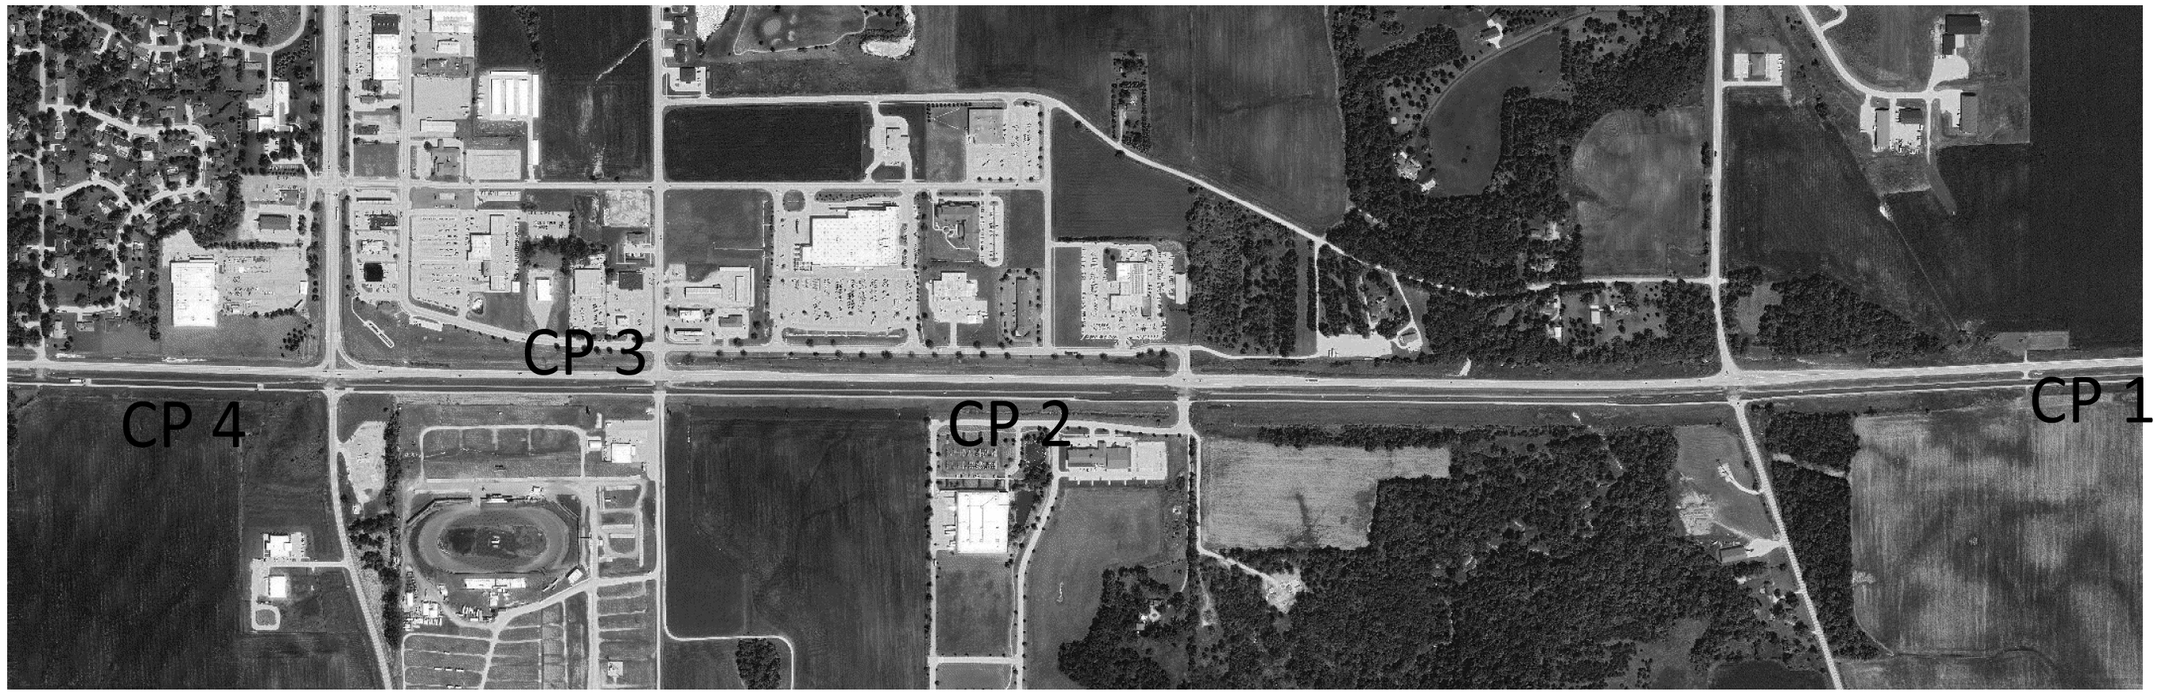
PROJECT DATUM: NAD83(2011) for EPOCH 2010.00 (IaRTN 2019 ADJUSTMENT)
COORDINATE SYSTEM: IOWA REGIONAL COORDINATE SYSTEM ZONE 8 (U.S. SURVEY FOOT)
VERTICAL DATUM: NAVD88
GEOID MODEL: 2018

Alignment Information

No alignment requested.

CONTROL POINT VICINITY MAP

This map is a guide to the vicinity of the primary project control points. Primary control is for use with RTK base stations and for RTN validation. Future surveys will use primary project control to establish temporary control as needed for construction or other surveying applications.



HORIZ. DATUM: NAD83(2011) for EPOCH 2010.00 (IaRTN 2019 Adjustment) - Iowa RCS Zone 08 (U.S. Survey Foot)

VERT. DATUM: NAVD88 - Geoid Model: 2018u3

Coordinate listing from next sheet will be used with IaRTN for monument recovery. No other reference ties are given.

TRAFFIC CONTROL PLAN

Maintain a single lane of traffic on US-30 in each direction for the duration of the project.

Some movements between Marshall Street, Crown Flair Drive, and US-30 will be restricted during construction.

Maintain access for all property owners adjacent to the project at all times.

108_26A
8/15/22

STAGING NOTES

Stage 1 Work - Construct temporary median widening along westbound US-30.

Stage 1 Traffic Control - The inside lane of westbound US-30 and the median crossing at the US-30/Marshall Street/Crown Flair Drive intersection will be closed.

Stage 2 Work - Construct temporary widening along the outside of eastbound and westbound US-30 and Crown Flair Drive. Construct temporary entrance between eastbound US-30 and Crown Flair Drive. Construct the north most portion of the roundabout and the westbound lane of Marshall Street.

Stage 2 Traffic Control - The outside lane of westbound US-30, the outside lane of eastbound US-30, the entrance from westbound US-30 to Marshall Street, and the US-30/Marshall Street/Crown Flair Drive intersection will be closed. The Crown Flair Drive intersection will be restricted to right-in, right-out operations at the existing intersection location. Westbound US-30 traffic wishing to access Crown Flair Drive will need to perform and u-turn maneuver at the US-30/Story Street intersection.

Stage 3 Work - Construct temporary median widening along eastbound US-30. Construct the middle portion of the roundabout and the new southern leg of the Crown Flair Drive intersection.

Stage 3 Traffic Control - The inside lane of eastbound and westbound US-30, the entrance from westbound US-30 to Marshall Street, and the US-30/Marshall Street/Crown Flair Drive intersection will be closed. The Crown Flair Drive intersection will be restricted to right-in, right-out operations at the existing intersection location. Westbound US-30 traffic wishing to access Crown Flair Drive will need to perform and u-turn maneuver at the US-30/Story Street intersection.

Stage 4 Work - Construct the south most portion of the roundabout and the remaining portion of Crown Flair Drive.

Stage 4 Traffic Control - The construction on westbound US-30 and the Marshall Street intersection is complete. Traffic on westbound US-30 and Marshall Street is returned to normal operations. The outside lane of eastbound US-30, the existing Crown Flair Drive entrance, and the US-30/Marshall Street/Crown Flair Drive intersection will be closed. The Crown Flair Drive intersection will be restricted to right-in, right-out operations at the temporary intersection location. Westbound US-30 traffic wishing to access Crown Flair Drive will need to perform and u-turn maneuver at the US-30/Story Street intersection.

Stage 5 Work - Construct remaining curb and roundabout center island.

Stage 5 Traffic Control - The inside lanes for eastbound and westbound US-30 will be closed. All other traffic is returned to normal operations.

Stage 6 - Project is substantially complete. All traffic is returned to normal operations, except for any short duration closures needed to perform final pavement markings.
