

INDEX OF SHEETS	
No.	DESCRIPTION
A Sheets	Title Sheets
A.1	Title Sheet
A.2	Location Map Sheet
B Sheets	Typical Cross Sections and Details
B.1 - 10	Roadway Typical Sections and Details
D Sheets	Mainline Plan and Profile Sheets
* D.1	Plan & Profile Legend & Symbol Information Sheet
* D.2	Interstate I-80 Plan Sheet
E Sheets	Side Road Plan and Profile Sheets
* E.1 - 4	NE 22nd Street \ Delaware Avenue Plan and Profile
* E.5	NE 51st Place Plan and Profile
E.6 - 7	NE 22nd Street \ Delaware Avenue Grading
G Sheets	Survey Sheets
G.1 - 2	Survey Control Points Reference Ties and Bench Marks
G.3	Horizontal Control Alignment Layout
G.4 - 5	Horizontal Control Alignment Geometry
J Sheets	Traffic Control and Staging Sheets
* J.1	Traffic Control & Staging Notes
* J.2	Traffic Control & Staging Legend & Symbol Info. Sheet
* J.3	Detour Map
* J.4 - 5	Traffic Control & Staging Plan Sheets
	NE 22ND Street Stage 1
* J.6	Traffic Control & Staging Plan Sheet - Interstate 80
* J.7 - 8	Traffic Control & Staging Plan Sheet
	NE 22ND Street Stage 2
* J.9	Traffic Control & Staging Plan Sheet
	NE 22ND Street Stage 3
* J.10	Traffic Control & Staging Plan Sheet
	NE 22ND Street Stage 4
L Sheets	Intersection Geometrics
* L.1	NE 22 nd Street Layout Sheet
V Sheets	Bridge and Culvert Situation Plans
V.1 - 4	Bridge Situation Plans
V.5 - 8	Culvert Pipe Plats
V.9	Retaining Wall Plan and Profile
X Sheets	Side Road Cross Sections
X.1 - 78	Side Road Cross Sections
	* Color Plan Sheets

NE 51ST PLACE

1101
04-30-02

Notes:
 B shall be C of roadway, dike, survey, or other; as detailed on plans.
 Skew angle is the angle which one end of the pipe is ahead (by stationing) of line perpendicular to the B (example skew Rt. ahead 30°).
 Refer to tabular listing and other plans for additional information.
 ① See Standard Road Plan RF-3 For Conc. or RF-5 for Metal.

PIPE CULVERT

4302
04-03-01

① Existing road surfacing (granular material) shall be placed as shown unless otherwise directed by the Engineer or provided for in the detail project plans.
 ② When specified, the upper 1' to be suitable for vegetation (grass or crops).
 Note:
 The work of obliterating or reshaping old roadbeds shall be done at the direction of the Engineer.

TYPICAL DETAILS FOR OBLITERATION EXISTING ROADBED

1301
10-03-00

Notes:
 B shall be C of roadway, dike, survey, or other; as detailed on plans.
 Extension shall be on line of existing structure to Lt., Rt. or both as specified. Adaptors may be required, see Standard Road Plan RF-2.
 Refer to tabular listing and other plans for additional information.
 ① See Standard Road Plan RF-3 for concrete, RF-5 for metal.
 ② Optional type "D" section only when specified in tabulation.
 ③ Existing structure.

04-21-09

Notes:
 B shall be C of roadway, dike, survey, or other; as detailed on plans.
 Skew angle is the angle which one end of the pipe is ahead (by stationing) of a line perpendicular to the B (example skew Rt. ahead 30 degrees).
 Refer to tabular listings and other plans for additional information.
 ① See Standard Road Plan RF-3 for Concrete or RF-5 for Metal and Polyethylene.

Special Note:
 Pipe Lengths are calculated based on length of Concrete Pipe.

UNCLASSIFIED PIPE CULVERT

Splash Basin Under Bridge Drain Typical Section

Splash Basin at Culvert Outlet Typical Section

① Center splash basin directly under bridge drain.
 Refer to Tabulation 100-23 for additional information.

ROCK SPLASH BASIN

6" HMA Paved Shoulder at guardrail. 7" PCC may be substituted with the following jointing layout:

Match mainline pavement joint spacing. When mainline pavement is 8" or greater in thickness, place additional transverse joints in shoulder at mid-panel of the mainline pavement. Place longitudinal joint at W/2 from edge of mainline pavement when W is greater than 10' wide. Terminate longitudinal joint at transverse joint less than 10' in length.

Compaction of HMA is required to face of guardrail post. Hand compaction will be allowed under guardrail. Removal & reinstallation of guardrail will be allowed with no additional payment.

Refer to Shoulder tabulation (112-9) for quantities.

- ① 6" subgrade treatment.
- ② When guardrail posts are installed prior to construction of paved shoulder, nail 1" x 6" untreated form boards along the face of guardrail posts for the length shown. This board is to prevent shoulder material from contacting the sides of the posts and altering the function of the guardrail. Form board not required for final 2 posts.
- ③ Continue paved shoulder to existing paved shoulder or 20' beyond the end of guardrail.
- ④ Shoulder may be notched for final 2 posts or post sleeves may be installed through pavement.

PAVED SHOULDER AT GUARDRAIL

Notes:
Where hot mix asphalt entrance fillets have been previously installed, they shall be used as constructed. The Granular shoulder material shall be placed around the fillet.

- ① Granular Surfaced Shoulder
- ② Possible HMA Paving or Resurfacing.

GRANULAR SHOULDER CONSTRUCTION THRU ENTRANCES

9503
07-15-97

CASE 'A'
WITH SHOULDER

CASE 'B'
WITHOUT SHOULDER

NOTES:

Stop signs should be confined to the shaded areas, but as close to the approach roadway as possible to provide the motorist with the best visual impact.

If possible, stop signs should be placed at the point where vehicles are to stop or as near as practical.

In rural areas, the lateral clearance should not be closer than 6' from the edge of a usable shoulder, or if none, 12' from edge of the traveled way.

In urban areas, stop signs should be placed a minimum of 6' from the near edge of the intersected street or a minimum of 4' in advance of the near edge of a marked crosswalk. Lateral clearance may be reduced to a minimum of 2' from the face of a curb.

Where the approach roadway consists of two lanes of traffic, a second stop sign should be placed where it is visible to traffic in the inner lane.

At channelized intersections, the additional stop sign may be placed on a channelized island or median.

## Survey Information

### General Information

Measurement units for this survey are US survey feet. This survey is for proposed bridge improvements at intersection NE 22nd. Ave at I-35.

### Vertical Control

This survey is relative to NAVD 88 vertical datum. A three wire level was run thru this project from the 2000/2001 survey Project # IM-35-3(146)86--13-77. A three wire level loop was run originating @ BM 722. A three wire level loop was then was run east along NE 54th Ave, then returned back to BM # 722. Additional three level loops were also run. Additional benchmarks were placed throughout this project using a GNSS Base-Rover setup at Pt. 24. A minimum of three observations were collected with 1 hour or greater time span between each observation. The local error of these observations relative was less than 0.04 ft. at 95% confidence level.

Vertical Equations to the Project Datum Bench Marks and Other Benches along this Survey are as Follows:

BM # 800 this survey Elev. = 984.04 (NAVD 88 English).  
= BM # 800 2000/2001 Survey Proj. # IM-35-3(146)86--13-77  
Elev. = 984.04

### Horizontal Control

A 2000-2001 GPS network for Project IM-35-3(146)86—13-77 was used. Datum is NAD83 (1996) Iowa State Plane South Zone (US Survey Feet.). The project coordinates are scaled about control Pt. G030- 609616.47N, 1618959.90E, 945.43EL.  
1/Combined Scale Factor of project= 1.000062537

### Alignment Information

#### Mainline Alignment (I-80)

The I 80 alignment was computed from a 1994 metric I 80 survey alignment. Metric alignment points were scaled and translated to this survey coordinate system. No rotation was required. Sta 2000+00.00 was assigned to the PC of the metric I 80 curve west of the Delaware Ave. Bridge. Stationing was run ahead without station equation to the end of the alignment at the mixmaster interchange central intersection point.

This Mainline survey relates to the mainline plan stationing as follows:

PC Sta. 2000+00.00 this survey (English)  
=PC Sta. 322+54.03m Project # IM-35-3(73)—13-77 (Metric)

PI Sta. 2006+53.61 this survey (English)  
=PI Sta. 324+53.264m Project # IM-35-3(73)—13-77 (Metric)

#### Ne 22ND Ave Alignment

The NE 22ND Ave alignment for this survey is a retrace of Polk County Plans Project # L-1511—73-77. Stationing was obtained at PI Sta. 26+56.0, and carried ahead to PI Sta. 106+20.7. The following PI points were used to create this CL alignment.

Note: L-1511—73-77 Plan alignment /survey alignment does not split the existing bridge floor on 22nd over I 80/35 by approximately 1 foot. This is not a concern because the concept is for relocation of 22nd.

PI 26+56.0 Polk County Plans Project # L-1511—73-77 (Fd. Nail)  
PI 53+11.5 Polk County Plans Project # L-1511—73-77 (Fd. X Bridge Floor)  
PI Sta 79+52.5 Polk County Plans Project # L-1511—73-77 (Fd. Hinge Nail)  
PI Sta 106+20.7 Polk County Plans Project # L-1511—73-77 (Fd. Hinge Nail)

This NE 54th Ave survey relates to the mainline plan stationing as follows:

PI Sta. 26+56.0 this survey  
=PI Sta. 26+56.0 Project # Polk County Plans Project # L-1511—73-77

PI Sta. 53+09.09 this survey

### STAGING NOTES

STAGING NOTES

Stage 1:

Traffic:

- Maintain two-way traffic on I-80/35.
- Temporary night closures will be required on I-80/35 during NE 22nd Street bridge girder erection.
- Maintain two-way traffic on existing NE 22nd Street from Station 2022+00 to Station 2067+85.
- Maintain local access to businesses during construction.
- Maintain local access to NE 51st Place during construction.

Construction:

- Install temporary sheet pile between existing 22nd Street and proposed 22nd Street roadway embankment, south of proposed bridge.
- Construct the proposed NE 22nd Street bridge over I-80/35 and south bridge approach pavement.
- Construct NE 22nd Street from Station 2047+00 to Station 2055+00.
- Construct temporary pavement on north side of NE 51st Place.
- Stage construct the south half of NE 51st Place to maintain local access during construction.

Stage 2:

Traffic:

- Maintain two-way traffic on I-80/35.
- Close through traffic on existing NE 22nd Street from Station 2022+00 to Station 2067+85.
- Maintain local access to businesses during construction.
- Maintain local access to NE 51st Place during construction.
- Detour traffic to US 69/ NE 14th Street. See Sheet J.3 for detour route.
- "NB" Traffic will be detoured to US 69/ NE 14th Street via NE Broadway Avenue and NE 54th Avenue.
- "SB" traffic will be detoured to US 69/ NE 14th Street via NE 54th Avenue and NE Broadway Avenue.
- Maintain railroad traffic at UPRR crossing.

Construction:

- Remove the existing NE 22nd Street bridge over I-80/35 and appurtenances.
- Mill 2" of existing pavement on NE 22nd Street from Station 2022+00 to Station 2031+80.
- Widen and construct NE 22nd Street from Station 2022+00 to Station 2037+32.
- Construct 2" surface course on NE 22nd Street from Station 2022+00 to Station 2037+32.
- Stage construct NE 22nd St half at a time to maintain local and business access during construction.
- Stage construct UPRR crossing at NE 22nd Street.

Stage 3:

Traffic:

- Close through traffic on existing NE 22nd Street from Station 2022+00 to Station 2067+85.
- Maintain local access to businesses during construction.
- Maintain local access to NE 51st Place during construction.
- Detour traffic to US 69/ NE 14th Street. See Sheet J.3 for detour route.
- "NB" Traffic will be detoured to US 69/ NE 14th Street via NE Broadway Avenue and NE 54th Avenue.
- "SB" traffic will be detoured to US 69/ NE 14th Street via NE 54th Avenue and NE Broadway Avenue.

Construction:

- Construct temporary pavement on west side of NE 22nd Street from approximate Station 2055+40 to Station 2062+00.
- Construct temporary pavement on south side of NE 51st Place.
- Mill 2" of existing pavement on NE 22nd Street from Station 2059+00 to Station 2067+85.
- Stage construct NE 22nd Street, east of baseline, from Station 2055+00 to Station 2067+85 to maintain local access during construction.
- Stage construct the north half of NE 51st Place to maintain local access during construction.

Stage 4:

Traffic:

- Close through traffic on existing NE 22nd Street from Station 2022+00 to Station 2067+85.
- Maintain local access to businesses during construction.
- Maintain local access to NE 51st Place during construction.
- Detour traffic to US 69/ NE 14th Street. See Sheet J.3 for detour route.
- "NB" Traffic will be detoured to US 69/ NE 14th Street via NE Broadway Avenue and NE 54th Avenue.
- "SB" traffic will be detoured to US 69/ NE 14th Street via NE 54th Avenue and NE Broadway Avenue.

Construction:

- Remove temporary pavement on west side of NE 22nd Street from approximate Station 2055+40 to Station 2062+00.
- Stage construct NE 22nd Street, west of baseline, from Station 2055+40 to Station 2059+00 to maintain local access during construction.
- Construct 2" surface course on NE 22nd Street from Station 2059+00 to Station 2067+85.
