FIELD EXAM QUESTIONS:

ML380

-Is there an existing inlet at station 1161+00 approx. 120' RT?

-Drainage between BOP and 537+00 is collected by various inlets/FES. Where do these pipes carry water to?

-The storm sewer manhole at 951+00 90.5' RT has a pipe feeding into it from the east. Where does this come from and what is the area that drains to it?

TRAFFIC CONTROL PLAN

Traffic Control Plan to be developed at a later date.

108-26A
08-01-08

STAGING NOTES

Stage 1 Traffic
Traffic on I-380 will be shifted approximately 1/2 lane width towards inside of roadway, partially onto the median shoulder. Temporary barrier rail will be placed adjacent to both northbound and southbound traffic. Access points at the four interchanges within the project limits will remain open.

Stage 1 Construction
Temporary pavement will be placed adjacent to existing outside shoulders for both northbound and southbound traffic. The width of the temporary pavement varies, and is to be accommodate traffic in Stage 2.

Stage 2 Traffic
Traffic on I-380 will be shifted onto the temporary pavement constructed in Stage 1. Access points at the four interchanges within the project limits will remain open.

Stage 2 Construction
Stage 2 includes removal of pavement, construction of NB Lane 1, the NB median shoulder, SB Lane 1, the SB median shoulder, and approximatley 6' of temporary pavement adjacent to newly constructed median shoulder. Stage 2 also includes construction of drainage structures within the median, and construction of storm sewer pipes beyond the pavement constructed with this stage.

Stage 3 Traffic
Traffic on I-380 will shift towards the median, partially using the temporary pavement constructed in Stage 2. A tempoaray barrier rail will be placed adjacent to both NB and SB traffic. Access points at the four interchanges within the project limits will remain open.

Stage 3 Construction
Stage 3 includes removal of remaining pavement, construction of NB Lanes 2-3, the NB outside shoulder, SB Lanes 2-3 and the SB outside shoulder, and grading outside of the roadway. Extension of pipes/culverts beneath the roadway and construction of storm sewer structures will be completed prior to paving. Paving includes NB and SB Lanes 2-3, auxillary lanes, and outside shoulders. Segments at interchange ramps will be skipped to limit ramp closure durations.

Stage 4 Traffic
Traffic on I-380 will remain shifted towards the median. Closure of ramps at the four interchanges within the project will be alternated to allow for roadway and ramp construction skipped during Stage 3.

Stage 4 Construction
Segments of roadway construction skipped during Stage 3 will be be completed during Stage 4.
