Highway Division

PLANS OF PROPOSED IMPROVEMENT ON THE

INTERSTATE ROAD SYSTEM

JOHNSON COUNTY

PCC PAVEMENT - GRADE AND REPLACE

I-80/380/US 218 Interchange near Iowa City

SCALES: As Noted

Refer to the Proposal Form for list of applicable specifications.

Value Engineering Saves. Refer to Article 1105.14 of the Specifications.

IOWA ONE CALL 1-800-292-8989 811 www.iowaonecall.com Know what's below. Call before you dig.

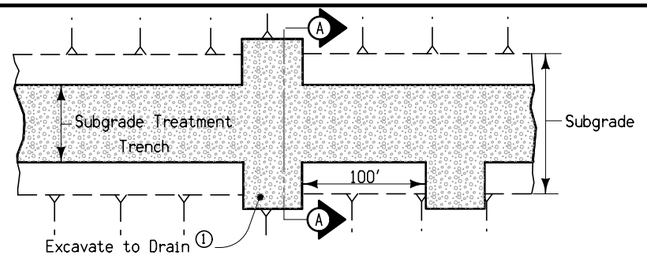
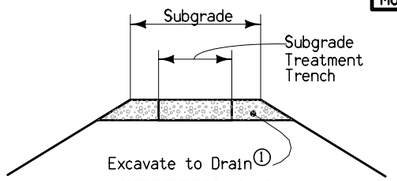
① Flowable Mortar.
② Granular Backfill.
③ 4″ subdrain at flowline elevation of culvert shall be extended into the culvert a distance of 2′ plus the height of the culvert. Granular Backfill covers subdrain and extends an additional 2′. Subdrain and granular backfill are incidental to flowable mortar.
④ Ends of culvert shall be plugged sufficiently to retain flowable mortar. Temporary earth berms are incidental to flowable mortar.
⑤ Removal of headwalls may be required.
⑥ Outlet shall be filled first. See injection point detail for additional information.

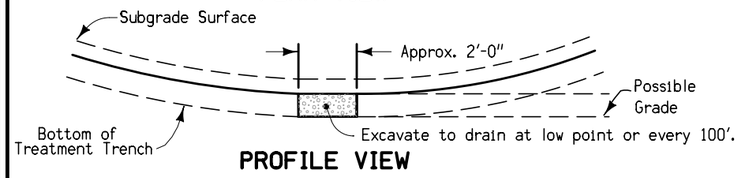
DETAILS OF CULVERT ABANDONMENT WITH FLOWABLE MORTAR (Rectangular structures less than 8′ in either height or width. Circular structures less than 10′ Dia.)



PLAN VIEW



SECTION A-A



PROFILE VIEW

① The contractor shall excavate a portion of subgrade as necessary to provide drainage for the treatment trench.
The additional excavation and Special Backfill for outlets is incidental and will not be paid separately.

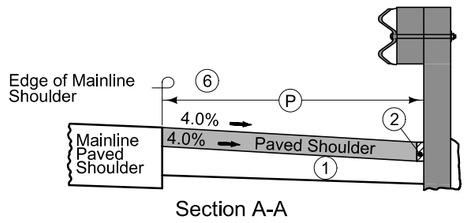
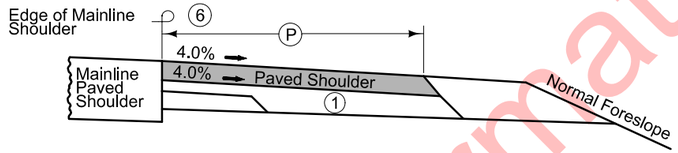
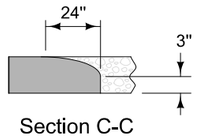
PLAN VIEW



Section A-A



Section B-B



Section C-C
Roll down at granular shoulder or earth.

6" HMA Paved Shoulder at guardrail. 6" PCC may be substituted with the following jointing layout:

Match mainline pavement joint spacing. When mainline pavement is 8" or greater in thickness, place additional transverse 'C' joints in shoulder at mid-panel of the mainline pavement. Place longitudinal 'C' joint at P/2 from edge of mainline pavement when P is greater than 10' wide. Terminate longitudinal joint at transverse joint less than 10' in length.

Compaction of HMA is required to face of guardrail post. Hand compaction will be allowed under guardrail. Removal and reinstallation of guardrail will be allowed with no additional payment.

Refer to Tabulation 112-9 for shoulder quantities.

(1) 6" Special Backfill.

(2) PCC option only: When guardrail posts are installed prior to construction of PCC paved shoulder, fasten form board to the face of guardrail posts for the length shown. Refer to note 4 for final 2 posts.

(3) Continue paved shoulder to existing paved shoulder or 20 feet beyond the center of the first post.

(4) Shoulder may be notched for final 2 posts or post sleeves may be installed through pavement. Do not drive posts through pavement.

(5) 'KT-1 joint for PCC shoulder.
'B' joint for HMA shoulder.

(6) In areas of superelevation, Paved Shoulder at Guardrail cross slope shall match adjacent roadway shoulder cross slope.

PLAN

1. Surfacing quantities based on a 6 inch layer of Macadam Stone base and a 4 inch layer of Class 'A' Road Stone. Apply surfacing as directed by the Engineer.
2. Construct 8:1 foreslope when drainage pipe is incorporated into the maintenance turnaround.
3. Install Polymer Grid between Class 10 and stone material.
4. See Standard Road Plan DR-212.

		Refer to tab 104-5B and to plan and profile views in the M sheets.
10	2435-0250704	**INTAKE, SW-507, WELL ONLY**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Bottom well was constructed during a previous project. Refer to NHS-080-6(371)239--11-52 for more details
11	2435-0250800	**INTAKE, SW-508**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
12	2435-0250900	**INTAKE, SW-509**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
13	2435-0251000	**INTAKE, SW-510**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
14	2435-0251218	**INTAKE, SW-512, 18 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
15	2435-0251224	**INTAKE, SW-512, 24 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
16	2435-0251230	**INTAKE, SW-512, 30 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
17	2435-0254700	**BARRIER INTAKE, SW-547**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Final intake tops must be cast-in-place to match adjacent pavement.
18	2435-0254704	**BARRIER INTAKE, SW-547, TOP ONLY**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Include reconstruction of intake top for six intakes (08038, 08039, 08040, 08057, 08095, and 08096).
		3- Payment will be made only if intake replacement was necessary.
		4- Final intake tops must be cast-in-place to match adjacent pavement.
19	2435-0254714	**BARRIER INTAKE, SW-547 MODIFIED, TOP ONLY**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Include removal and replacement of existing top. Refer to MODIFIED RA-47(3) MEDIAN INTAKE detail in IM-80-6(233)241--13-52 for existing intake details.
20	2435-0254900	**BARRIER INTAKE, SW-549**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Final intake tops must be cast-in-place to match adjacent pavement.
21	2435-0256204	**INTAKE, SW-562, TOP ONLY**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Bottom well was constructed during a previous project. Refer to NHS-080-6(371)239--11-52 for more details
22	2435-0256210	**INTAKE, SW-562 MOD**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Refer to Modified Standard Road Plans in the M Sheets.
23	2435-0600120	**INTAKE ADJUSTMENT, MAJOR**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.
		2- Include adjustments to intakes 08038, 08039, 08056, 08057, and 08096. Refer to Tab 104-5B notes.
24	2501-8400172	**TEMPORARY SHORING**
		This item covers all of the temporary shoring needed for storm sewer removal and installation.
25	2502-8212212	**SUBDRAIN, PERFORATED PLASTIC PIPE, 12 IN. DIA.**
		This item covers the subdrain pipe as part of French Drain. Refer to M Sheet tab 104-5B, plan and profile
		views, and French Drain detail in the M Sheets.
26	2502-8215112	**SUBDRAIN, CORRUGATED METAL PIPE, 12 IN. DIA.**
		This item is used to connect median slotted drain pipe to an intake for two slotted drains.
		See Table HRG-02 in the M Sheets for more details details.
27	2503-0114215	**STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 15 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
28	2503-0114218	**STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 18 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
29	2503-0114224	**STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 24 IN.**
		1- Refer to tab 104-5B and to plan and profile views in the M sheets.

Item No.	Item Code	Description
		2- Quantities include additional 8 feet for 4 remove and replace pipe segments at connections to existing
		storm sewer pipes or structure. Refer to Tab 110-14 in the M Sheets. All 4 pipes were constructed during
		project NHS-080-6(371)239--11-52 and they are: P-38040, P-38067, P-38095, P-380107 for reference.
30	2503-0114230	**STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 30 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
31	2503-0114236	**STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 36 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
32	2503-0114248	**STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 48 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
33	2503-0116324	**STORM SEWER GRAVITY MAIN, TRENCHED, 2000D LOW CLEARANCE CONCRETE PIPE, EQUIVALENT DIAMETER 24 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
34	2503-0124224	**STORM SEWER GRAVITY MAIN, TRENCHLESS, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 24 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
35	2503-0124230	**STORM SEWER GRAVITY MAIN, TRENCHLESS, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 30 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
36	2503-0124248	**STORM SEWER GRAVITY MAIN, TRENCHLESS, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 48 IN.**
		Refer to tab 104-5B and to plan and profile views in the M sheets.
37	2503-0200036	**REMOVE STORM SEWER PIPE LESS THAN OR EQUAL TO 36 IN.**
38	2503-0200341	**STORM SEWER ABANDONMENT, PLUG, LESS THAN OR EQUAL TO 36 IN. DIA.**
39	2503-0200342	**STORM SEWER ABANDONMENT, FILL AND PLUG, GREATER THAN 36 IN. DIA.**
		1- Refer to tab 110-14 in the M sheets.
		2- Removal of pipes is considered incidental to grading operations unless the pipe is specified to be
		maintained are/or removed at a later stage.
		3- Includes abandonment (plug and fill) of median slotted drains immediately before placing permanent
		median barrier.
40	2510-6750600	**REMOVAL OF INTAKES AND UTILITY ACCESSES**
		Refer to tab 110-15 in the M sheets.
41	2529-5070110	**PATCH, FULL-DEPTH FINISH, BY AREA**
42	2529-5070120	**PATCH, FULL-DEPTH FINISH, BY COUNT**
		These two items cover patching of existing mainline I-80 pavement needed after installing temporary
		drainage structures and temporary inlet openings near existing pavement along I-80.
43	2599-9999005	**SUBDRAIN RISER, 15 IN., WITH NYLOPLAST BEEHIVE CASTING**
		Subdrain risers are used as interim drainage intakes during this project and future projects until they
		are removed. Contractor shall maintain those intakes and prevent any debris that could cause clogging
		to the opening of the intake. Measurement and payment shall be made for each subdrain riser and will include
		a nyloplast beehive casting, and inlet/outlet adapter as shown in the detail in the M sheets. All pipe
		bends, fittings, trenching, backfill, and all related work shall be incidental to subdrain riser installation.
44	2599-9999009	**DRAIN, CORRUGATED METAL SLOTTED PIPE, 12 IN., W/7.5 IN. GRATE**
		1- Refer to Median Slotted Drain detail in the M sheets
		2- Refer to Tab. HRG_02 (Medain Slotted Drain) in the M sheets.
		3- Measured in linear feet along the centerline of the pipe from the beginning of slotted drain to the
		center of intake. Lengths of elbows and tees are included in the length of pipe measured.
		4- Payment will be made at the unit price of the CMP slotted drain per linear foot including the slotted
		drain extender plates, #4 rebar, and PCC or HMA pavement associated with pipe installation.
		5- Unit price includes, but is not limited to, slotted drain extender plates and grates, rebar, PCC or
		HMA pavement matching adjacent pavement, trench excavation, dewatering, furnishing bedding material,
		placing bedding and backfill material, joint wrapping, wyes and other fittings, pipe joints, pipe
		connections, testing, and inspection
45	2599-9999020	**MACADAM STONE FOR FRENCH DRAIN**
		This item covers placement of macadam stone as part of French Drain. Refer to M Sheet tab 104-5B,
		plan and profile views, and French Drain detail in the M Sheets.
46	2602-0000400	**TEMPORARY INTAKE OR MANHOLE COVER ASSEMBLY**
47	2602-0000410	**MAINTENANCE OF TEMPORARY INTAKE OR MANHOLE COVER ASSEMBLY**
48	2602-0000420	**REMOVAL OF TEMPORARY INTAKE OR MANHOLE COVER ASSEMBLY**
		Temporary intake or manhole cover will be used to cover the bottom well of the intakes listed below
		before the intake top is placed at a future stage as specified. Refer to Tab 104-5B notes for details.
		The intakes are: 08038, 08039, 08043, 08046, 08052, and 08056.

REMOVAL OF INTAKES AND UTILITY ACCESSES

Notes:

1- Remove and replace pipe segment at connections to existing storm sewer pipes or structures that are listed to be removed. Remove and replace pipe segment to the nearest joint. If removing pipe segment will undermine adjacent pavement, saw-cut a new joint at a suitable location and replace damaged pipe segment. Removal of pipe is paid for with item “REMOVE STORM SEWER PIPE LESS THAN OR EQUAL TO 36 IN.” or “REMOVE STORM SEWER PIPE GREATER THAN 36 IN” as listed. Pipe replacement is paid for with the bid item "STORM SEWER GRAVITY MAIN, TRENCHLESS, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 24 IN"

NOTES:

1- Connect to the slotted drain constructed during stage 1A

2- Conenct the end of slotted drain to intake 08047 with a 12" corrugated metal pipe. Paid by item "SUBDRAIN, CORRUGATED METAL PIPE, 12 IN. DIA." total length = 68.0'. Placement of the 12" corrugated metal pipe follow the same specifications for placement of the slotted drain pipe.

3- Conenct the end of slotted drain to intake 08052 with a 12" corrugated metal pipe. Paid by item "SUBDRAIN, CORRUGATED METAL PIPE, 12 IN. DIA." total length = 161.0'. Placement of the 12" corrugated metal pipe follow the same specifications for placement of the slotted drain pipe.

SANITARY OR STORM SEWER ABANDONMENT OR REMOVAL

DE110_14
12/05/19

* Not a bid item

Location/Description	Sanitary or Storm Sewer	Abandonment, Plug Only or Abandonment, Plug and Fill or Removal	Length of Pipe		Fill Material*	Remarks
			≤ 36 inch diameter	> 36 inch diameter	Flowable Mortar or CLSM	
			LF	LF	CY	
Notes:						
1- Remove and replace pipe segment at connections to existing storm sewer pipes or structures that are listed to be removed.						
Remove and replace pipe segment to the nearest joint. If removing pipe segment will undermine adjacent pavement, saw-cut						
a new joint at a suitable location and replace damaged pipe segment. Removal of pipe is considered incidental to grading						
operations for the corresponding stage. Pipe replacement is paid for with the bid item "STORM SEWER GRAVITY MAIN,						
TRENCHLESS, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 24 IN"						
2- Abandon, plug and fill all median slotted drains during the placement of permanent median barrier along US-218 and I-380.						
Coordinate with permanent median barrier contractor. Refer to Tab. 104-5B in the M Sheets of project NHS-080-6(371)239--11-52						
for connection intakes station location. Refer to the as-builts for the actual locations of slotted drains along I-380.						
3- Abandon, plug and fill all median slotted drains during the placement of permanent median barrier along I-80. Coordinate						
with permanent median barrier contractor. Refer to Tab. 104-5B a in the M-Sheets for connection intakes station location.						
GN: All culverts that are not listed above are to be removed with the corresponding stage and are incidental to grading operations

PIPES

Design Length, Slope, and Flowlines are calculated from inside wall to inside wall along CL of pipe. An additional 2 ft length is added to each side of the Design Length to account for estimated length to center of structures.

PIPES

Design Length, Slope, and Flowlines are calculated from inside wall to inside wall along CL of pipe. An additional 2 ft length is added to each side of the Design Length to account for estimated length to center of structures.

NOTES:

1. For Information Only - U.A.C.
2. Refer to M-sheets for Modified Standard Road Plans and Special Details
3. Staged construction of pipe may be needed. Cap upstream end of pipe to be removed during a future stage when the remaining of of the pipe or the upstream structure is constructed. Placement and removal of cap shall is incidental to pipe installation.
4. Remove pipe from the upstream end to the location specified. Pipe opening will be used as an inlet for interim drainage purposes.
5. Standpipe construction to be paid for with item "SUBDRAIN RISER, 15 IN., WITH NYLOPLAST BEEHIVE CASTING" and includes all bends, fittings, connections to associated drainage elements and pipe modifications. Pipe slope shall maintain minimum 0.4% slope.
6. Remove the upstream portion of the existing pipe and connect a standpipe for interim drainage purposes.
7. Place sandbags on the downstream end of the openings to prevent bypass. Sandbags are incidental to pipe construction.
8. Removal of existing pavement might be required for the installation of the structure and the associated pipe. Where applicable, patching will be paid for with item "PATCH, FULL-DEPTH FINISH, BY AREA" and/or item "PATCH, FULL-DEPTH FINISH, BY COUNT".
9. Place an orange safety fence around the pipe opening.
10. Connection of proposed structure to existing cross-road pipe shall be incidental to the associated proposed structure, including field bends as needed. When applicable, removal of existing pipe within the structure shall be incidental to the associated proposed structure.
11. Concrete invert at the bottom of the bottom well shall not be constructed until the final intake top is constructed during a future stage. Concrete invert shall make a smooth transition between connecting pipe inverts.
12. install temporary subdrain riser 372-24 during Stage 1A. During Stage 2B, adjust subdrain riser location and form grade elevation as needed and grade to drain towards the riser immediately after existing pavement removal. Any adjustments to the subdrain riser and/or grading is considered incidental to subdrain riser installation. If pipe P-372-24 extension was needed during Stage 2B, pipe extension is paid for with item "STORM SEWER GRAVITY MAIN, TRENCHED, REINFORCED CONCRETE PIPE (RCP), 2000D (CLASS III), 15 IN.".
13. Refer to M-Sheets for French Drain Detail. The subdrain pipe longitudinal slope to maintain a minimum of 0.4% slope. Structure name (i.e. 372-01, 372-38, etc.) is intended as a point along French Drain for horizontal location purposes, and is not an actual structure nor bid item. The subdrain pipe is paid for with item "SUBDRAIN, PERFORATED PLASTIC PIPE, 12 IN. The macadam stone is paid for with item "MACADAM STONE FOR FRENCH DRAIN".
14. Install Intake 08038 with form grade elevation = 764.89' during Stage 1A. Paid for by item "BARRIER INTAKE, SW-547". During Stage remove intake top and adjust bottom well so that the top elevation of the bottom well = 758.57' and cover the top of bottom wel with ROAD DESIGN DETAIL 570-5. Contractor to use appropriate methods to adjust bottom well wall elevation using rebar and/or splices as needed. Engineering approval for the proposed methods is required. Remove the intake cover during Stage 3D and insta intake top with form grade elevation = 759.90'. Adjustments to bottom well are paid for by item "INTAKE ADJUSTMENT, MAJOR". Installation of intake top during stage 3D is paid for by item "BARRIER INTAKE, SW-547, TOP ONLY".
15. Install Intake 08039 with form grade elevation = 756.80' during Stage 1A. Paid for by item "BARRIER INTAKE, SW-547". Remove top an bottom well with a solid steel plate during Stage 2D. During Stage 2F, adjust bottom well so that the top elevation of the bott = 753.01' and cover the bottom well with ROAD DESIGN DETAIL 570-5. Adjustments to bottom well are paid for by item "INTAKE ADJU MAJOR". Install intake top during Stage 3D with form grade elevation = 754.34'. Installation of intake top during stage 3D is pa for by item "BARRIER INTAKE, SW-547, TOP ONLY".
16. Pipe will outlet into an existing or an interim ditch or foreslope. Grade to drain at the outlet if needed. Grading shall be incide pipe installation. A pipe extension might be added during a future stage. Refer to 104-5b for details.
17. Construct bottom well so that the top elevation of the bottom well = 688.26' and cover the bottom well with a heavy duty steel bar during Stage 1A. Construct intake top during Stage 3B. Adjustments to bottom well is paid for by item "INTAKE ADJUSTMENT, MAJOR"

PIPES

Design Length, Slope, and Flowlines are calculated from inside wall to inside wall along CL of pipe. An additional 2 ft length is added to each side of the Design Length to account for estimated length to center of structures.

	(2) Line Number	(2) Intake/ Utility Access No. From	To	Class 'D'	(1) Pipe Size IN	Bid* Length FT	Design Length FT	Slope %	Connected Pipe Joint (DR-121) Type	Flow Lines: Inlet Elevation	Outlet Elevation	Other Elevation	Pipe Profile Sheet No.	Notes

18. Staged construction of pipe may be required. Connect P-08003 to temporary structure 372-02 during stage 1A. Remove approximately 11.0' of the upstream end of the pipe and construct intake 08003 during Stage 2B. Removal of pipe shall be incidental to structure 08003 installation. Final pipe upstream flow line elevation at structure 08003 = 739.33'.
19. Staged construction of intake is needed. cover the top of bottom well with ROAD DESIGN DETAIL 570-5. Remove intake cover and construct intake top during a future stage. Intake bottom well and intake top are paid for by item "BARRIER INTAKE, SW-547".
20. Construct intake 08057 with form grade elevation = 679.40' during Stage 1B. Paid for with item "BARRIER INTAKE, SW-547". Intake top sha be pinned to the bottom well or tied using keyed construction joints. Adjust intake to the listed form grade elevation during Stage Adjustments to bottom well are paid for by item "INTAKE ADJUSTMENT, MAJOR". Intake top is paid for by item "BARRIER INTAKE, SW-547, TOP ONLY".
21. Construct bottom well so that the top elevation of the bottom well = 684.50' and cover the bottom well with a heavy duty steel plate d Stage 2B. Note that the temporary slotted drain connection is at elevation = 682.00' +/-. During Stage 2D, adjust bottom well so tha top of the bottom well is at elevation = 687.05'and cover the bottom well with a ROAD DESIGN DETAIL 570-5. Construct intake top dur bottom well and intake top are paid for with item "BARRIER INTAKE, SW-547". Adjustments to bottom well are paid for by item "INTAKE ADJUSTMENT, MAJOR".
22. Staged construction of pipe might be needed. Pipe will outlet into existing ditch during Stage 1B. Grade to drain at the outlet if nee Grading shall be incidental to pipe installation. Complete construction of pipe during Stage 2D to connect to structure 08077.
23. Top elevation of apron end wall shall be 9" higher than the apron's flow line. Use of DR-121, Type 2 (Connected Pipe Joints) required for apron / pipe joint and next upstream joint in pipe (2 joints).
24. Construct permanent top section on existing bottom-well section, previously constructed by others. Field verify existing well elevations and adjust proposed construction heights as necessary to achieve form grade, as specified.
25. Intake rotated 24 degrees from ML080 alignment. The outlet pipe P-08079-1 connects to the 7 ft wide wall.
26. New intake top is paid for by item "BARRIER INTAKE, SW-547, TOP ONLY".
27. 7.5 Degree D-Section.
28. Pipe P-RampA-30 will be constructed during Stage 1A and pipe opening will be used for interim drainage purposes. Structure RampA-30 wi constructed during Stage 2C. Removal of pipe within structure is considered incidental to structure construction. P-RampA-30 flow l elevation at the connection with structure RampA-30 = 675.22'.
29. Install SW-512 Case 2 (18" riser). Cap the upstream opening of the SW-512 through pipe.
30. Install intake 08040 with form grate elevation = 748.00' during Stage 1A. Paid for by item "BARRIER INTAKE, SW-547". Top slab shall be tied to the bottom well using keyed construction joints or other methods that would not cause damage to the bottom well when the to removed during Stage 3D. Remove and replace top During Stage 3D with the form grade elevation = 748.28'. Paid for with item "BARRIE INTAKE, SW-547, TOP ONLY".
31. Staged construction of intake might be needed. Cover bottom well with a steel plate until the intake top is installed during a future
32. Coordinate with MSE wall contractor for conflict locations. Refer to M sheets for Intake Along MSE Wall Detail.
33. Remove existing subdrain riser and connect proposed P-372-53 to existing PEX-372-54 with TYPE PC-1 connection. Pipe connection (372-54 considered incidental to pipe installation. Construct 372-53, 372-54, and P-372-53 immediatley before the overnight construction of pavement for SB I-380 to EB I-80 loop.
34. Install intake 08053 with form grate elevation = 688.30' during Stage 1A. Paid for by item "BARRIER INTAKE, SW-547". Top slab shall be to the bottom well or tied using keyed construction joints. Remove and replace intake top to the form grade elevation = 690.84' dur Stage 3B. Adjustments to bottom well are paid for with item "INTAKE ADJUSTMENT, MAJOR". Installation of intake top during stage 3B for by item "BARRIER INTAKE, SW-547, TOP ONLY".
35. Construct all bottom wells for intakes along the open median of US-218 first and grade the median ditch to drain towards the bottom we Do not install intake tops until the week immediatley prior to shifting traffic and the start of construction of SB US-218 pavement Stage 2C. Complete the final median ditch grading after installing intake tops before the beginning of Stage 2C. The late finish re of intake tops and final grading is needed to avoid storm sewer spread into SB pavement during Stage 2B. Coordinate with roadway p contractor.

(1) Diameter or equivalent diameter

(2) XSTS = Existing Structure IS = Interim Structure IP = Interim Pipe TS = Temporary Structure TP = Temporary Pipe

STORM SEWER

INTAKES AND UTILITY ACCESSES

No. (2)	Location Station and Offset	*Type or Standard Road Plan	Form Grade Elev.	Bottom Well Elev.	Other	Notes
36						Slope of top of structure is shown in the "Other" column. Positive grade represents slope towards the roadway and negative grade represents slope away from the roadway.
37						Install intake 08047 with form grate elevation = 721.130' during Stage 2C. Paid for by item "BARRIER INTAKE, SW-547". Top slab sha tied to the bottom well using keyed construction joints or other methods that would not cause damage to the bottom well when th removed during Stage 3B. Remove and replace top During Stage 3B with the form grade elevation = 721.39'. Paid for with item "BA INTAKE, SW-547, TOP ONLY".
38						Grade the area between Proposed Ramp A and Existing Ramp A to drain towards apron intake 372-95 during Stage 1A. Grade the are bet detour and existing Ramp A towards apron intake 372-95 during Stage 1B. Grading shall be incidental to pipe and apron construct
39						Connection of existing pipes to proposed structure is considered incidental to structure installation.

PIPES

Design Length, Slope, and Flowlines are calculated from inside wall to inside wall along CL of pipe. An additional 2 ft length is added to each side of the Design Length to account for estimated length to center of structures.

Line Number (2)	Intake/Utility Access (2) No. From	To	Class 'D'	Pipe Size (1) IN	Bid* Length FT	Design Length FT	Slope %	Connected Pipe Joint (DR-121) Type	Flow Lines: Inlet Elevation	Outlet Elevation	Other Elevation	Pipe Profile Sheet No.	Notes
													GENERAL NOTES:
													GN1 Maintain drainage flows at all times. Pumping and any other work required for maintaining flows shall be incidental to associated construction.
													GN2 Temporary capping of pipe ends and structure walls and covering staged structure construction at stage breaks shall be incidental to the associated pipe or structure.
													GN3 Refer to C Sheets for subdrain outlets into storm sewer structures.
													GN4 Refer to M Sheets for slotted drain locations. Contractor shall determine the appropriate elevations of slotted drain connections to storm structures
													GN5 All steel plates used to cover bottom wells shall have a min wt = 370 lbs. And include lifting hook inside frame in lieu of grate. Ste plates are incidental to structure installation.
													GN6 All intake SW-547 final tops shall be cast-in-place.
													GN7 Pipe class "2000 J" refers to pipes that will require trenchless "Jacking" construction.
													GN8 All ROAD DESIGN DETAIL 570-5 are paid for by item "TEMP INTAKE OR MANHOLE COVER ASSEMBLY". Maintenance and removal of the intake cover paid for by items "MAINT OF TEMP INTKE OR MANHLE CVR ASMBLY" and "RMVL OF TEMP INTKE OR MANHLE CVR ASMBLY" respectively.
													GN9 All pipe IDs that begin with "PEX" refer to existing pipes.
													GN10 All pipe and structure IDs that begin with "P-372" and "372" are temporary pipes and structures and shall be removed or abandoned during or at the end of the project.

EC-301	10-18-16	Rock Erosion Control (REC)
EC-302	10-16-18	Rock Check Dam
EC-601	10-16-18	Temporary Sediment Control Basin
EW-403	04-18-17	Temporary Erosion Control Measures
TC-1	04-16-13	Work Not Affecting Traffic (Two-Lane or Multi-Lane)
DR-402	04-17-18	Rock Flume For Bridge End Drain
570-5	04-18-17	EROSION CONTROL FOR INTAKE OR MANHOLE WELL
570-7	04-18-17	GRATE INTAKE SEDIMENT FILTER BAG
570-11	10-15-19	TEMPORARY SEDIMENT CONTROL FOR CULVERT EXTENSION WITH EXPOSED SOIL

ESTIMATE REFERENCE INFORMATION

DE100-4A
10/29/02

Item No.	Item Code	Description
1	2503-0500402	**BRIDGE END DRAIN, DR-402**
		Refer to RR Sheets for location. Refer to Tab. 104-8A for more details.
2	2507-3250005	**ENGINEERING FABRIC**
		Engineering fabric shall be material as specified for embankment erosion control in accordance with
		Article 4196.01,B,3, of the Standard Specifications.
		Refer to Tabulation 100-23.
3	2507-6800061	**REVETMENT, CLASS E**
		Estimated at 1.6 ton/cu yd.
		Refer to Tabulation 100-23. Refer to RR Sheets for plan view.
4	2610-0000214	**MULCH, WOOD CHIP BERMS, PLACEMENT**
		Approximately 3000 CY of slash mulch is stockpiled in the NW quadrant of the project site and additional
		quantities may be produced on-site. Use this slash mulch as an alternative to revetment, erosion stone,
		and other erosion control measures as directed by engineer.
5	2601-2634100	**MULCHING**
		Mulch all seeding areas according to Article 2601, E, 2. except the areas covered with wood excelsior mats or
		hydraulic mulching. Anchor mulch into the soil using mulch anchoring equipment with a minimum of two passes.
		Included for areas requiring reshaping and seedbed preparation.
		Mulch shall be Certified Noxious Weed Seed Free Mulch as certified by the Iowa Crop Improvement Association
		or adjacent states Crop Improvement Associations.
		Mulch Rate: 1 ½ tons of dry cereal straw or native grass straw per acre.
6	2601-2634105	**MULCHING, BONDED FIBER MATRIX**
		Use hydraulic mulch in wet areas, difficult to access areas, medians and along the area adjacent to the
		shoulder of interstate projects if needed.
7	2601-2636015	**NATIVE GRASS SEEDING**
		Use permanent native seeding in the backslopes, outside ditches, and forselopes. Finalize seeding the
		backslope immediately after grading operations and tillage are complete within the preferred seeding
		timeframe. Do not seed until areas are no longer needed for construction access. Areas in the foreslopes
		that are within 8 feet off of the edge of shoulder should not be seeded with native seeding, refer to bid
		item "SEEDING AND FERTILIZING (RURAL)".
8	2601-2636043	**SEEDING AND FERTILIZING (RURAL)**
		Seed and fertilize with rural permanent seeding in areas within 8 feet ofset off of the edge of the shoulder.
		Do not seed until areas are no longer needed for construction access.
9	2601-2636070	**HYDRAULIC SEEDING**
		Use rural stabilizing crop seeding and fertilizing mixture. Add rural seeding for median ditch and for areas
		within 8 feet from the edge of the shoulder where hydraulic mulch is used. Use native grass seeding
		mixture in foreslopes, outside ditches, and backslopes where hydraulic mulch is used.
10	2601-2638352	**SLOPE PROTECTION, WOOD EXCELSIOR MAT**
11	2601-2640350	**SPECIAL DITCH CONTROL, WOOD EXCELSIOR MAT**
		Refer to Tabulation 100-22.
		Prepare seedbed according to Article 2601.03,B,4 of the Standard Specifications. Install mat
		according to Article 2601.03,H,2 of the Standard Specifications. Seed according to Article 2601.03,H,2 of
		the Standard Specifications. Refer to Table 2601.03-7 for seed mixture.
12	2601-2642100	**STABILIZING CROP - SEEDING AND FERTILIZING**
		Finalize seeding all backslopes, foreslopes, and ditches immediatley after grading operations are complete.
13	2601-2643110	**WATERING FOR SOD, SPECIAL DITCH CONTROL, OR SLOPE PROTECTION**
		Estimated quantity based on a maximum of 50 gallons of water per SQ applied initially, then over 3 separate
		mobilizations, as described below.
14	2601-2643300	**MOBILIZATION FOR WATERING**
		3 Mobilizations. See Article 2601.05, A, 13 for further detail.
15	2602-0000010	**SILT DITCHES**
		Refer to Tabulation 100-13.
16	2602-0000020	**SILT FENCE**
		Refer to Tabulation HRG-01 in the R Sheets.
		Refer to plan view in the R Sheets.
		The HRG-01 tabulation includes estimated locations and elevations for placement of "Silt Fence for foreslope".
		Silt fence flare ups at the endings of each 200 FT long segment of continues silt fence (per Standard Road
		Plan EC-201) are not shown in the erosion and sediment control plan view in the R Sheets, but are accounted
		for in the quantities. Column "# of Silt Fences in Series" in Tab. HRG_01 contains the number of 200 FT long
		silt fence segments for each continues silt fence at a specific contour elevation.
		Verify the specific locations with the Engineer prior to beginning placement. Bid item includes 25% additional
		quantity for field adjustments and replacements.
		Silt fence placement for boring and receiving pits are considered incidental to the boring operations.

ESTIMATE REFERENCE INFORMATION

DE100-4A
10/29/02

Item No.	Item Code	Description
17	2602-0000030	**SILT FENCE FOR DITCH CHECKS**
		Refer to Tab. 100-18. The tabulation includes estimated locations for placement of Silt Fence for Ditch
		Checks to address possible erosion during construction. Verify the specific locations with the Engineer
		prior to beginning placement. Bid item includes 50% additional quantity for field adjustments and replacements.
		All silt fences listed in this tabulation follow Type 1 installation per Standard Road Plan EC-201 unless
		specified otherwise. Each row in the tabulation show the station range for which a number of silt fences listed
		under column "Total # of Silt Fences" shall be placed at spacing of the value listed under column "Spacing".
		For each row in the tabulation, begin silt fence count starting from the downstream end.
		Refer to plan view in the R Sheets.
18	2602-0000040	**SILT DIKES**
		Refer to Tabulation 100-15.
19	2602-0000050	**SILT BASINS**
		Refer to Tab. 100-14. The tabulation includes estimated locations for placement of Silt Basins to address
		possible erosion during construction. Verify the specific locations with the Engineer prior to beginning
		placement. Bid item includes 100% additional quantity for field adjustments and maintenance.
20	2602-0000071	**REMOVAL OF SILT FENCE OR SILT FENCE FOR DITCH CHECKS**
		Refer to Tabulations 100-18 and HRG-01. This item is included for silt fence and silt fence for ditch check
		removal required for staging reasons, for replacement (replacement to be paid separately), or for areas
		that have achieved 70% permanent growth.
21	2602-0000080	**REMOVAL OF SILT BASINS**
		Refer to Tabulation 100-14.
22	2602-0000101	**MAINTENANCE OF SILT FENCE OR SILT FENCE FOR DITCH CHECK**
		Refer to Tabulations 100-18 and HRG-01. This item is included for cleanout and repair of the silt fence
		and silt fence for ditch checks during the project.
23	2602-0000130	**TEMPORARY SEDIMENT CONTROL BASIN**
24	2602-0000135	**REMOVAL OF TEMPORARY SEDIMENT CONTROL BASIN**
25	2602-0000140	**MAINTENANCE OF TEMPORARY SEDIMENT CONTROL BASIN**
		A total of 3 cleanouts were assumed for each temporary sediment control basin.
		Refer to Tabulation 100-33 .
26	2602-0000160	**ROCK CHECK DAM**
27	2602-0000170	**MAINTENANCE OF ROCK CHECK DAM**
28	2602-0000180	**REMOVAL OF ROCK CHECK DAM**
		Refer to Tab. 100-32.
		Quantites include an additional 10% of the bid quantity of Silt Fence for Ditch Checks to reflect possible
		replacement for Silt Fence for Ditch Checks during the grading project. A total of 3 cleanouts for each rock
		check dam were assumed. Each rock check dam was assumed to be 16 linear feet.
29	2602-0000320	**PERIMETER AND SLOPE SEDIMENT CONTROL DEVICE, 20 IN. DIA.**
30	2602-0000350	**REMOVAL OF PERIMETER AND SLOPE SEDIMENT CONTROL DEVICE**
		Refer to Tabulation 100-19.
31	2602-0000400	**TEMPORARY INTAKE OR MANHOLE COVER ASSEMBLY**
32	2602-0000410	**MAINTENANCE OF TEMPORARY INTAKE OR MANHOLE COVER ASSEMBLY**
33	2602-0000420	**REMOVAL OF TEMPORARY INTAKE OR MANHOLE COVER ASSEMBLY**
		Refer to Tabulation 100-11. Payment is full compensation for inspecting fabric sock and replacing when flow
		capactiy is reduced to 50%.
34	2602-0000530	**GRATE INTAKE SEDIMENT FILTER BAG**
35	2602-0000540	**MAINTENANCE OF GRATE INTAKE SEDIMENT FILTER BAG**
36	2602-0000550	**REMOVAL OF GRATE INTAKE SEDIMENT FILTER BAG**
		Refer to Tabulation 100-37.
37	2602-0010010	**MOBILIZATIONS, EROSION CONTROL**
		This item is included for a single or multiple erosion control mobilization performed by a single crew for
		this project. The quantity will be paid for at the unit price of $500.00 each for Mobilizations, Erosion
		Control, which is full compensation for staged movement of labor, equipment, and materials; and labor, tools,
		equipment, and incidentals necessary to complete the movement. Additional mobilizations not outlined in the
		ECIP must be approved by the Engineer. Failure to mobilize when erosion control work is needed to comply
		with the ECIP or PPP, will result in the Engineer, by written order, direct mobilization within 72 hours of
		a written order. Failure to mobilize within such time period, will result in a deduction of $750.00 per
		calendar day from payment due under the contract, except when Engineer extends such time period.

ESTIMATE REFERENCE INFORMATION

DE100-4A
10/29/02

Item No.	Item Code	Description
38	2602-0010020	**MOBILIZATIONS, EMERGENCY EROSION CONTROL**
		This item is included for erosion control mobilization in case of a sudden occurrence of a serious and urgent
		nature which is beyond normal maintenance of erosion control items. Emergency work requires immediate
		mobilization and movement of necessary labor, for movement of labor, equipment and materials; and for labor,
		tools, equipment, and incidentals necessary to complete the movement. Mobilize with sufficient labor, equipment,
		and materials on job site within eight hours of Engineer's written order to install temporary erosion control
		items on an emergency basis. Engineer's written order will include a description of required work. Only one
		mobilization will be paid for work described in the written order. Failure to mobilize within eight hours of
		written order, will result in a deduction of $1500.00 per calendar day from payment due under the contract,
		except when Engineer extends such time period.
39	2599-9999001	**DEEP TILLAGE**
		Equip tillage equipment with arrowhead type shoe providing lateral displacement and limit movement of subsoil
		to the surface. Obtain Engineer's approval for equipment. It is intended that following subsoil tillage, the
		area remain in a loosened condition. Additional compaction or operation of heavy equipment, other than that
		required for topsoil placement and shaping, will not be allowed on areas tilled. Till at 3 foot maximum centers
		and at right angles to finished slope. For ditch and foreslope areas, perform subsoil tillage after 8 inch top
		soil replacement. Tillage shall be done to an average depth of 18 inches. Deep tillage on ditch and foreslope
		areas should not be completed until areas are no longer needed for construction access; coordinate with the
		engineer regarding possible future access needs. For backslope areas, perform subsoil tillage to an average
		depth of 12 inches prior to placement of 8" topsoil and seeding.
40	2599-9999002	**SLASH MULCH, PRODUCE AND STOCKPILE**
		Trees removed as part of this clearing, grubbing, or removals during this project shall be shredded to generate
		slash mulch to be used for erosion control on this and subsequent projects. Storage of the stockpiles shall be
		in a well drained location to keep the mulch reasonably dry and free from contamination. This item shall be
		measured by cross-section of each produced stockpile and paid for by the calculated cubic yards of mulch.
		This item does not include placement of the mulch as erosion control, placement is paid under item 2610-0000214.

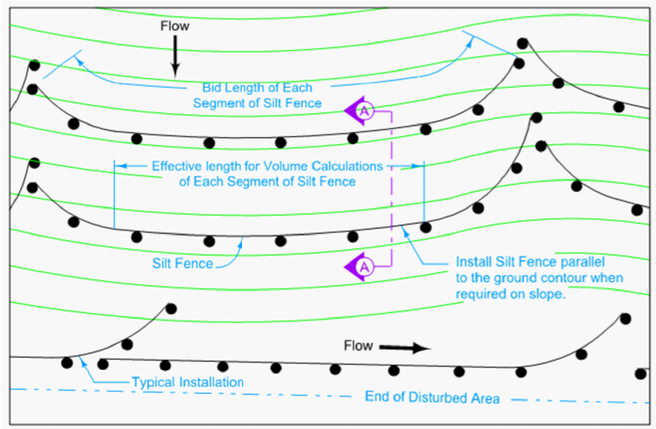
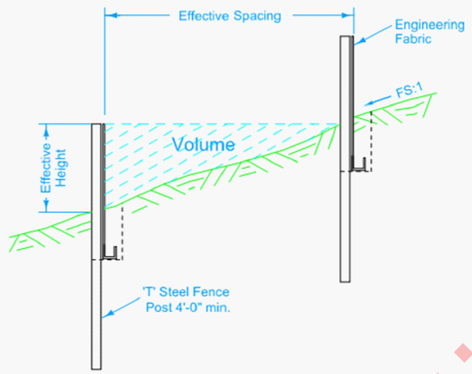
SILT FENCES FOR FORESLOPES

HRG-01
12/05/19

Possible Standard: EC-201





SECTION A-A

* The functional height used in the volume equation is 85% of effective height. The minimum effective height is 1.58 feet as shown on EC-201.
* Minimum Spacing = FS:1 * Effective Height
* Maximum continuous length of silt fence is 200 feet, the last 20 feet will be flared up, therefor the maximum effective length of 160 feet was used for detention volume computations
* Silt fence shall be placed parallel to the ground contour lines in the disturbed area
* The last 20 feet of each silt fence segment was assumed to be flared-up 45 degrees for the installation length calculation purposes
* Volume equation: [0.5*(Spacing)*(Effective height of Silt Fence)*(Total Effective Length of Silt Fence)]

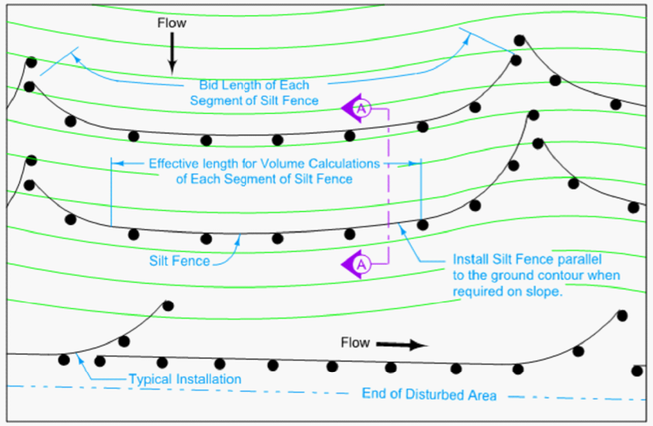
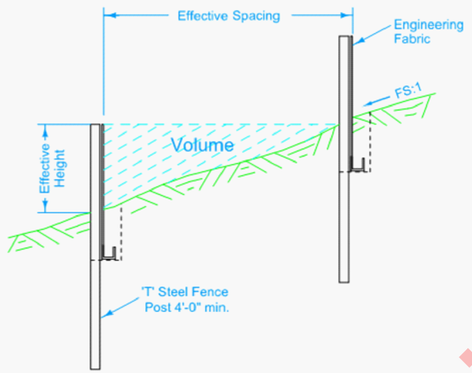
SILT FENCES FOR FORESLOPES

HRG-01
12/05/19

Possible Standard: EC-201





SECTION A-A

* The functional height used in the volume equation is 85% of effective height. The minimum effective height is 1.58 feet as shown on EC-201.
* Minimum Spacing = FS:1 * Effective Height
* Maximum continuous length of silt fence is 200 feet, the last 20 feet will be flared up, therefor the maximum effective length of 160 feet was used for detention volume computations
* Silt fence shall be placed parallel to the ground contour lines in the disturbed area
* The last 20 feet of each silt fence segment was assumed to be flared-up 45 degrees for the installation length calculation purposes
* Volume equation: [0.5*(Spacing)*(Effective height of Silt Fence)*(Total Effective Length of Silt Fence)]

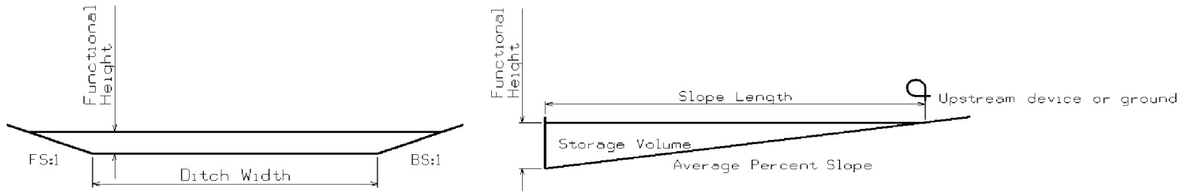
TEMPORARY SEDIMENT CONTROL BASIN

DE100-33
10/16/18

Possible Standard: EC-601



* The functional height used in the volume equation is 95% of effective height. Effective height is 2.5 feet as shown in EC-601.
* Volume equation: $[(1/4*(FS*H^2))+(1/2*DW*H)+(1/4*(BS*H^2))]*(H/Avg\%Slope)$
