BENCH CONTROL

This survey is relative to the NAVD88 vertical datum. A three wire bench level loop was run from the beginning to the end of the project. An automatic engineer's level and three-section Philadelphia level rod was used. The bench loop originated and closed on project benchmark #501. This is benchmark #501 from the 1994 Iowa DOT US 20 Survey SAP# 331 NHS-20-9(121)--19-31. The elevation of 325.038 meters was converted to 1066.395 feet for this survey.

The bench loop followed the corridor of the 1987 US 20 P.C.C. Paving (Grading) As-built plans F-20-9(72)--20-31 and the 1986 US 20 Grading P.C.C. Paving (& A.C.C Resurfacing) plans F-20-9(65)--20-31.

The datum plane for the above plans is indicated as "U.S.C. & G.S." The bench loop included 11 benchmarks recovered from the 1987 plans with the elevation differences ranging from 11.39 feet to 11.45 feet higher than this survey and averaging 11.43 feet higher than this survey. The bench loop included 2 benchmarks recovered from the 1986 plans with the elevation differences being 0.01 feet higher and 0.04 feet higher than this survey.

Vertical equations to the Project Benchmarks and other benches along this survey are as follows:

DENSIFICATION OF PROJECT CONTROL

The purpose of this portion of the survey was to retrace the as-built mainline horizontal alignment of U.S. 20 from the Peosta Iowa interchange to the westerly terminus of the 1994 Iowa DOT US 20 Survey SAP# 331 NHS-20-9(121)--19-31.

This survey is in English units and the horizontal datum is the 2000 Iowa DOT Local Project Plane.

The 1987 US 20 P.C.C. Paving (Grading) As-Built Plans F-20-9(72)--20-31; the 1986 US 20 Grading P.C.C. Paving (& A.C.C Resurfacing) Plans F-20-9(65)--20-31; and information from the 1994 Iowa DOT US 20 Survey SAP# 331 NHS-20-9(121)--19-31 were used.

BOP stationing started at a found 1/2" rod at POT Sta. 759+82.78 of the 1987 plans and carried forward to the EOP.

The alignment was retraced using found 1/2" rods at POT 759+82.78 and PC 792+99.93 of the F-20-9(72)--20-31 As-Built Plans; and found 1/2" rods at POT 941+51.21 (PI this survey) and PC 959+99.14, found cut "x" in centerline of WBL near PT 979+78.83, a found 1/2" rod near PI 1006+40.88, a found cut "x" near ST 1014+43.49, and found 1/2" rods near PC 1022+20.39 and near PI 1029+64.85 of the F-20-9(65)--20-31 As-Built Plans

SECTION A-A

Construct ramp exit pavement the same thickness as mainline pavement.

Ramp exit pavement shown by shaded area is 1336 square yards.

For jointing layout, see Standard Road Plan PV-410, Sheet 2 of 2.

This design is based on 60 mph design speed at e max = 6%.

For location equivalent stations, see Tabulation 101-15.
Equate Point 'M' (Ramp Stationing) to Point 'C' (Mainline Stationing).

(1) For header construction details at the beginning of taper, see Typical 7101 or Typical 7102.

(2) Construct subbase for ramp exit pavement the same thickness as mainline subbase.

SECTION

A = Concrete Pipe Length
B+C+E = Unclassified Roadway Letdown Pipe Length

℄ is ℄ of roadway, dike, survey, or other as detailed on the plans.

Skew angle is the angle which one end of the pipe is ahead (by stationing) of a line perpendicular to the ℄.
(Example: skew Rt. ahead 30 degrees)

Standard type joint couplings are required. See Materials I.M. 441.

(1) Refer to the following:
DR-201 for circular concrete.
DR-202 for low clearance concrete.
DR-203 for circular metal.
DR-204 for arch metal (metal pipe only).
DR-205 for circular concrete with end wall.
DR-206 for low clearance concrete with end wall.

(2) Optional "D" section only when specified in the tabulation. Refer to DR-141.

(3) See DR-121
