

On Monday, August 10th, 2020 at 11:11 am a WWD was detected turning EB onto the WB exit ramp at CR-X49 and US-20.

This was not an actual WWD. The detected driver went the wrong way to talk with the driver of a stopped semi truck. The driver approached from the north, backed up (the wrong way) onto the ramp, spoke with the driver, and then returned to CR-X49.
