Follow Up Flag: Follow up
Flag Status: Flagged

Emily – I have a (possible) wrong driver from over a year ago that needs video reviewed and documented. In this example, the camera video where we think the WWD occurred has been saved, but nobody has reviewed the video clips yet. This would be a good one for you to start on. (I hope there really was one!!)

The videos can be found here:

<N:\2019\20191029 WL I-380 at US 20 possible WWD>

I created this quick map showing where each of the cameras with saved video are located.

Here is the link to the “white paper” that tells the interns how to document the event.:

<S:\White Papers for Engineering Interns\For Intern Tasks>

Then look for “How to Document Wrong Way Drivers”. I just updated it today, so it should be fairly useful. Since we already have the videos downloaded, you can skip steps 1 to 13 and start at Step #14 after you have found the WWD on the videos.

Try and do as much as you can by yourself, but if you run into a snag or have some questions, send Matt or myself an e-mail and we can hopefully answer fairly quickly.

Willy

I'm not aware either, but will have my intern Evan review the video that you download.

Thx..... Willy

Willy,

We got this request for a WWD in Waterloo last night (10/29-30). Were you aware of anything on I-380? I didn't see an EIN. I don't have time to go through all of these cameras, so I'll just pull the video. But wanted to see if you were aware.

Sinclair
