

On Sunday 5/20/2018 at about 3:58 am, a WWD was reported traveling EB in the WB lanes of I-80 near MM 254. The WWD is not seen on ICTV10 and so it is assumed that the WWD was initially traveling EB in the correct lane but crossed to the WB lanes at the MM 252.6 crossover. There are no other cameras in the area so the WWD is assumed to have exited I-80 at Exit 254 (CR-X30).
