

On Monday 9/30/2019 at 6:50 pm, a WWD entered the IA-100 EB exit ramp to Edgewood Rd going WB. At the end of the ramp, the WWD turned sharply to self-correct and continued on IA-100 EB. The entire maneuver was seen on CRTV35.

Although their initial travel direction on Edgewood Rd is not seen on video, it is assumed they came from the north as Edgewood Rd has a raised concrete median blocking left turns onto the ramp.
