

2-17-2019 3:38 AM I-80 and US 65
A driver was seen by camera DM-27 heading south on 65. Driver stops for about 4 minutes then turns around and heads NB in the SB lane. WVD was not seen by DM-26 as it was zoomed in. WVD was also not seen by DM-56 as it was facing east and covered in ice. A snowplow driver reported a WVD heading EB in the WB lane on I-80. DM-25 showed no WVD. It is assumed the driver took the off ramp and proceeded EB in the WB lanes until self correcting near the 34th Ave overpass.
