

On Tuesday, 4/23/2019 around 9:10 AM a WWD was seen traveling SB in the NB lanes of I-29. CBTV35 shows the driver come from the intersection of I-29 and I-680. I-680 was closed North of the intersection due to flooding. It is assumed the driver came from the closed road as it is seen not coming from the east or west. For a couple miles south of the intersection the road was down to one lane so cones were set out. The WWD traveled on the closed lane. WWD self corrected at N 25th Street.
